

CRISPR Cre-Rat with HB9-CreERT2 Promoter

Product Information

Catalog Number 554-1 (embryo); 554-2 (rat)
Description
Strain Sprague Dawley rat

The HB9-CreERT2 rat model was generated using CRISPR/Cas9 for use as a breeding mate for conditional knockout/ knock-in rat models. To achieve this, a pair of *in vivo* validated gRNAs, a single-stranded deoxyribonucleic acid (ssDNA) donor, and the Cas9 protein were injected into the mouse embryos. Mice born from the injection were screened by genotyping PCR and NGS/ Sanger sequencing to confirm founders (F0). The Cre rat line generated expresses Cre recombinase under the control of tissue specific gene promoter HB9. Furthermore, DNA recombinase activity is induced by Tamoxifen, so that the Cre-Lox model can be both conditional and inducible.

Description

Promotor Name	Technology	Tissue/Cell-specificity	Promotor Description	Comments	Reference
HB9-CreERT2	CRISPR/cas9	Motor neurons	9-kb HB9 promoter	n/a	Arber <i>et al</i> 1999 Yang <i>et al</i> 2001; Tasic <i>et al</i> 2011

Shipping Embryos (dry ice) and rats (cages)

Storage and Stability Store CRISPR Cre-Rat embryos in liquid nitrogen freezer immediately upon receipt. Store the plasmids and ganciclovir at -20°C. Do not freeze-thaw plasmids repeatedly. The products provided in this kit are stable for at least 6 months from the date of receiving when stored as directed.

Safety Precaution **PLEASE READ BEFORE HANDLING ANY FROZEN VIALS.** Please wear the appropriate Personal Protective Equipment (lab coat, thermal gloves, safety goggles and a face shield) when handling the cells. Handle the frozen vials with due caution. Please be aware that the following scenario can occur: Liquid nitrogen can leak into the vials when the vials are submerged in liquid nitrogen. Upon thawing, the liquid nitrogen returns to the gas phase, resulting in a dangerous build-up of pressure within the vial. This can result in the vial exploding and expelling not only the vial contents but also the vial cap and plastic fragments of the vial.

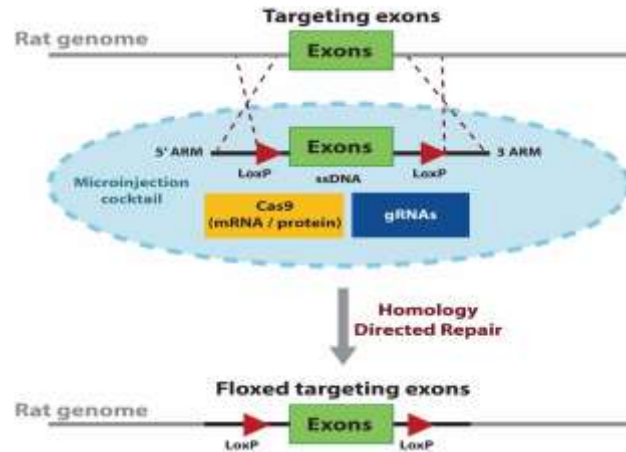

Restricted Use This product is for research use only and not intended for human or animal diagnostic or therapeutic uses.

Catalog#	Component	Amount	Available
554-1	CRISPR Cre-Rat Embryo – HB9-CreERT2	1 straw	inquire
554-2	CRISPR Cre-Rat – HB9-CreERT2	1 rat	inquire

Supporting Validation Data*

Summary of Available Validation Data

Limited Validation Data is Available: The F0 mice were not mated with WT to ensure transmission of the cKO genotype to F1 generation.

* Please inquire prior to purchasing.
